SCIENCE PROJECT Worksheet: PART 1

SLE: _____

Scientific Question & Hypothesis

Science Project (Proposed) Topic: _____

(Teacher must approve science project topic before the student is allowed to create and perform an experiment to complete it.)

Identifying the Problem/Scientific Question:

What do you want to know or explain (about your chosen/proposed topic)? Your question needs to address the problem or topic you want to investigate (i.e., by carrying out an experiment to find out). *Below write the scientific question you intend to investigate for your science project:*

Hypothesis:

What do you think will happen (when you carry out your experiment)? Your hypothesis is “an educated guess” of what you think will happen or what you expect to happen. The hypothesis is intended to predict the answer to your question or the outcome of the experiment. *Below write the hypothesis – your educated guess – that you expect to happen or occur when you perform the experiment for your science project:*
